

SNP Amendment our Conservative Group Motion on the creation
of a Working Group – Supported by the Labour Group

“Council agrees to use the existing Placemaking initiative arrangements so that local communities along with elected representatives can develop a comprehensive transport strategy, covering rail, road and public transport. We believe that local communities are best placed to determine their own priorities which will support local economic regeneration with realistically achievable outcomes. We can attract investment from governments and bodies such as Transport Scotland if there is a sound economic case supported by the community, which supports other public investment including the Ayrshire Growth Deal and Levelling Up investment, including the Bellfield Roundabout which will connect with the A76 corridor.”
